Marina Kapustina

Accounting & Finance Student | Financial Reporting & Power BI

Email: markap2405@gmail.com | Location: Helsinki, Finland

Strengths

Financial Reporting & Closing | IFRS & IAS Fundamentals | Finnish VAT, Payroll & Tax Depreciation | Corporate Finance & Valuation | Excel (PivotTables, Power Query, Data Model, VBA) | Power BI & DAX | Finance Process Automation (Power Automate, RPA) | Data Visualisation | Detail Precision | Analytical Thinking

Professional Summary

Third-year Accounting and Finance student at Haaga-Helia University of Applied Sciences, certified Microsoft Power BI Data Analyst Associate (PL-300). Coursework covers the full accounting cycle up to financial statements, Finnish VAT, payroll and tax depreciation, an introduction to key IFRS and IAS standards, and corporate finance (NPV, IRR, cost of capital). I build Excel models and Power BI dashboards that turn raw data into clear findings for management, and I want to bring that precision and structured way of working to a finance, audit or reporting team.

Education

Haaga-Helia University of Applied Sciences | Helsinki **2024 – Present**

Bachelor's degree in International Business, Accounting and Finance major

- **Financial accounting** – bookkeeping, adjustments, period-end closing, financial statements, basic consolidation.
- **Finnish taxation** – domestic and cross-border VAT, payroll and statutory employer contributions, tax depreciation.
- **IFRS & corporate finance** – introduction to key IFRS/IAS standards; NPV/IRR, WACC, bond valuation, cash-flow analysis.
- **Finance automation** – process modelling, RPA and AI assistants in Power Automate, automation business cases.
- **Tools** – Excel (PivotTables, Power Query, Data Model, VBA), Power BI (data modelling, DAX), Procountor.

Certificates

Microsoft Certified: Power BI Data Analyst Associate (PL-300) – Microsoft Jul 2026

IFRS 9 Financial Instruments, Part 1: Classification and Measurement (score 100%) – Deloitte Sep 2026

IAS 32 Financial Instruments: Presentation (score 90%) – Deloitte Sep 2026

Basics of Service Design – Eduhouse Sep 2026

Key Projects

Finnish Tourism Dashboard | Power BI | 2026

- Built a six-page interactive Power BI report on accommodation, passenger volumes, tourism consumption, demand and employment in Finland for a group of foreign tourism entrepreneurs.
- Combined several open-data sources, wrote DAX measures and added slicers, maps, KPI cards and page navigation.

Sales Summary for the CEO | Excel course simulation | 2026

- In a course simulation task, analysed sales across 20 Swedish municipalities, 11 counties and 22 salespeople using Power Query, the Excel Data Model, PivotTables, slicers and a map, and wrote the key observations for management.

HRM Intensive Week | Tampereen Energia

- Worked on a real-company HR and financial analysis project and presented the findings to company representatives.

Work Experience

Temporary Customer Service Representative | Nordic Business Forum | Sep 2025

- Welcomed attendees and managed check-in at a large international business event.
- Guided guests around the venue so that sessions started on time.
- Worked in a team of 200+ staff in a fast-paced environment.

Languages

Russian C2 | English C1 | Estonian B2 | Finnish B1

Skills & Coursework in Detail

Demonstrated in course assignments and exercises at Haaga-Helia (2024–2026); workbooks and Power BI files available on request.

Excel & automation

- Multiple advanced-level formulas implemented across projects, including lookup, conditional, text, date and financial functions.
- PivotTables and pivot charts with slicers, Excel tables, data validation, conditional formatting, charts.
- Power Query and the Excel Data Model for combining and analysing larger datasets.
- VBA: recorded and edited macros, Do-While loops to reshape data, form-control buttons; Excel AI functions.

Power BI

- Data import from Excel and CSV, Power Query transformations (merge queries, data types), date tables, relationships.
- DAX measures (e.g. order counts, previous-year sales) and multi-page reports with cards, combo charts, maps, decomposition tree, slicers and navigation buttons.
- Management reporting course: in a team, built a Power BI financial overview for the real-company case IUIGA (revenue, customers and basket size by sales channel) and presented it to a simulated management board.

Automation and Robotics in Finance (course)

- Modelling financial processes and identifying automation opportunities for software robotics (RPA), AI and advanced Excel automation.
- Microsoft Power Automate: RPA workshop building no-code software robots and AI assistants; application mock-ups built with AI.
- Calculating the benefits and cost savings of automation projects and prioritising them; the business analyst (financial process expert) role.

Financial accounting & closing

- Journal entries and T-accounts, periodic inventory method, trial balance, adjusting entries, statement of changes in equity.
- Year-end closing for Finnish limited companies: inventory valuation, holiday-pay accruals, bad debts, foreign-currency loans, accrued interest; correcting misstated financial statements; group eliminations.

Finnish tax, VAT & payroll

- VAT postings, deductibility, monthly VAT return (OmaVero); intra-EU trade, import and export.
- Payroll calculation and postings: withholding tax, pension, unemployment, health, accident and group life insurance.
- Planned vs. tax depreciation and depreciation difference; warranty provisions; taxable income and deductible expenses.

IFRS

- Introductory study with basic exercises: IFRS 3, IFRS 7, IFRS 9, IFRS 10, IFRS 15, IFRS 16, IFRS S1, IFRS S2, IAS 1, IAS 32, IAS 36.
- Practice cases in IFRS 15 revenue recognition and IFRS 16 lease accounting (right-of-use asset, lease liability).
- Deloitte e-learning certificates in IFRS 9 and IAS 32.

Corporate finance & management accounting

- Time value of money, bond pricing and yield to maturity, risk and return, CAPM, WACC, capital structure and leverage.
- Capital budgeting with NPV, IRR, MIRR, payback, sensitivity analysis; cash-flow statement scenarios and liquidity ratios.
- Activity-based costing and customer profitability analysis; ESG report analysis.
